

## EEE Best cases criteria

To enter a best case for the Energy Efficiency Expert mapping tool, the case should include the following criteria:

- ✓ innovation in techniques and tool compared to the state-of-the-art
- ✓ innovation in the application of well-known tools and competencies
- ✓ impact on the field at the local and national level
- ✓ innovation in the financial instruments exploited
- ✓ innovative ways to propose energy-efficiency projects to clients (eg. proposing a holistic approach including financial instruments to support the investment)

If your case complies with the criteria mentioned above, please go ahead with adding your case to the form below.

Thank you

The EEE Consortium
